

## **REMARKS**

The drawings were objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: 360bu and 800.

The Examiner's attention is called to page 14, line 13 wherein the reference numeral 360bu is referred to. Similarly on page 17, line 17, reference numeral 800 was referred to as a rigid support. Since these reference characters shown in the drawings find support in the specification, these objections should be removed.

Replacement sheets for Figs. 1-14 are enclosed which formalize the drawings that were submitted with the application. No other changes have been made. Approval by the Examiner is respectfully requested.

By this amendment the title of the invention has been changed per the Examiner's suggestion to clearly indicate the invention to which the claims are directed.

Claims 1-16 were rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of co-pending U.S. Application Serial No. 10/061,851.

Applicants believe that this rejection is not proper. US Patent No. 6,936,131 corresponds to Co-Pending Patent Application No. 10/061,851. This patent is assigned to a different assignee than Eastman Kodak Company. Therefore, the double-patenting rejection is inappropriate. Although, the patent has not been applied against the claims in this case, applicants respectfully point out to the Examiner that in claims 1 and 11, the only independent claims in the case, element c requires transporting the cover plate in alignment with the device substrate through a pressure roll apparatus to provide uniform bonding. Further, there is no discussion of singulating the device substrate. Applicants believe that claims 1 and 11 are unobvious in view of US Patent No. 6,936,131.

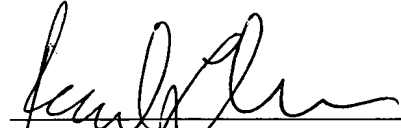

Claims 15 and 16 were objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim.

Claims 15 and 16 have been cancelled.

In view of the foregoing, it is believed none of the references, taken singly or in combination, disclose the claimed invention. Accordingly, this

application is believed to be in condition for allowance, the notice of which is respectfully requested. If there is a problem with this amendment, applicant's attorney would appreciate a phone call at 585-477-4653.

Respectfully submitted,

Attorney for Applicant(s)
